SUMMARY

- **15 yrs.** of hands on experience in **GIS mobile** and web applications, which includes **understanding of requirements**, produce **design document**, **software design**, **coding, testing, deployment, team management and client management.**
- Working knowledge of **ArcGIS, QGIS, GeoServer, Open Layers** and **ArcGIS API for JavaScript** and **Hexagon products**.
- Good knowledge of managing **Geodatabase and FME** | Data Integration Platform
- 6 yrs. experience as a technical lead, web and mobile app architect
- Good experience of working on **Android**, **iOS, Hybrid (React Native, Cordova, Flutter), Xamarin platform**, **frameworks** and customizing it as per requirements.
- **Extensive experience** with **Java, J2EE**, EJB, JMS, Micro Services, JSP, Servlets, Spring Core, Spring IOC, **Spring Boot**, Spring Data JPA, Spring AOP, Spring Security, **Spring Integration**, Spring JDBC, **Spring MVC**, Spring Integration, **WebLogic, JBoss, Apache Tomcat** and Hibernate ORM.
- Good knowledge of web app development in **Python Django, PHP Laravel, Ruby on Rails, Node JS**, **C#, PHP and ASP.net** technologies
- Developed front-end web pages using **JSP, JSF, Primefaces, JQuery**, Java Script, **Angular**, HTML5, CSS, **react JS**, Bootstrap
- Good skills in **Agile Development** and Test Driven Development
- Good expertise in **Hybrid technologies** such as react-native, Flutter, Apache Cordova (Phone Gap)
- Experienced in **UI**, **UX Design**, can translate concept design into user interface on mobiles like Android, iPhone, iPad iPod, Tablet
- Experience in writing **Micro Services**, **Web Services SOAP, XML, and JSON RESTFUL** for mobile/web as **backend** with JWT and Single sign on security
- Building & maintaining a large, highly secure infrastructure within (AWS) - **Amazon Web Services (EC2, S3, RDS)** with AWS Cloud Formation.
- Excellent in **PL/SQL** writing and **Creating Database, Tables, Views, Procedures, triggers**
- Very good experience in **MySQL**, **Oracle**, SQL Server, **PostGIS** and **Mango DB**.
- Experienced with **Google, Apple Approval Distribution Process**, AdHoc Enterprise distribution.
- Involved in various parse level application and well aware of parsing of **SOAP**, **XML** and **JSON** formatted services for Android, iPhone and iPad.
- Experience of using version control and bug reporting tools like **SVN** and **GIT** etc.
- Good knowledge in **JSF, prime faces,** and **Oracle ADF faces**
- Strong working experience in **application integration** using Web services such as JAXB, JAX-WS, SOAP, WSDL, JAX-RS, RESTFUL.
- Experience of **Maven**, Gradle, **Dockers** and **Jenkins**

SKILLS SUMMARY

Languages	Java, C#, Python, Ruby on Rails, C/C++, Kotlin, Swift, Objective C, HTML, SQL,VB6, VBA
GIS based technologies	ArcGIS, QGIS, GeoServer, OpenLayers, ArcGIS API for JavaScript GeoMedia. PostGIS, Oracle Spatial, geodatabase and FME | Data Integration Platform
Web technologies	JSP, Spring framework , JDBC, GWT, EJB, RMI, JNDI, Tiles, Struts, Hibernate, JPA, Spring Boot, MVC, Security, XML, Servlets, JSF, ADF Faces, Asp.net. PHP Laravel
Application Servers	BEA Web logic 8,9 , JBoss, Apache Tomcat, IIS

Databases	Oracle 12g/11g/10g/9i, MySQL, SQL Server, Mango DB
Testing/Debug	JUnit, Log4j, Drools
Source Config	CVS, GIT, SVN, Clear Case, Maven, Jenkins
IDE	Eclipse, XCode, Android Studio, Visual Studio, JDeveloper, NetBeans
Operating System	Linux, Windows, Mac
Portal development	Microsoft share point portal and Liferay Portal

Academic Background

- **Master in Computer Sciences** yrs. 2004
- Microsoft Certified Professional
- Microsoft Certified Solution developer
- Java Certified Professional

Few Major Projects

1. **ESDIM GIS Mobile App**
   Role: As a Lead Developer Architect
   A GIS mobile application developed in Java android and Swift.

2. **Express Mobile App**
   Role: As a Lead Developer
   A mobile application developed in Java android and Swift

3. **SMOS (Smart management operation suit)**
   Role: As a technical lead
   A enterprise web and mobile solution developed in Java, spring Boot, Hibernate, Android and IOS platform

4. **Logistic operation and support management system**
   Role: As Lead Developer
   A Web and mobile application solution developed in Java, prime faces, android and IOS platform

5. **Insurance Management System**
   Role: As Lead Developer
   A web and mobile solution developed in Asp.net MVC, C#, React Js, and mobile app developed in Xamarin Native (android and ios)

6. **E-Trading (online trading complete solution)**
   Role: As Lead Developer
   A web application developed in Java, Oracle ADF and oracle business component

7. **Billing system**
   Role: As Team member
   A billing system developed in Java, J2EE, JSF, Primefaces, Hibernate

Experience

Organization: (April 2013 - Current)
Atheeb intergraph Saudi company Riyadh Saudi Arabia http://aisc-sa.com/
Designation: Senior Mobile and web developer architect
Roles & Responsibilities:
- Understanding client requirements and Programming and develop web and mobile applications
- Produce design document based on requirement study
- Work closely with QA engineers, product managers, UXI experts and designers in order to produce top quality apps

- Work as independent and lead a team of developers

- Deploy app on client test and production system and lead UAT activity

- Work closely with product management to communicate trade-offs, alternatives, and effort, and to ensure the very best customer experience

- Take a data driven approach, and pitch in with efforts to innovate to continuously improve delivery speed and quality

Organization: (**Jun 2010** to **Jan 2013**)
Netsol technologes Lahore Pakistan https://www.netsoltech.com/
Designation: Lead Mobile and web developer/Architect
Roles & Responsibilities:
- Understand client requirements and Programming and develop web and mobile applications
- Produce design document
- Lead technically develop team
- Close contact with QA department for Quality
- Deploy app on client side and provide training

Organization: (**July 2009** to **June 2010**)
FutureNow technologies Lahore Pakistan www.fnint.com
Designation: Senior software developer
Roles & Responsibilities:
- Write code for new software and maintain existing software code, deployment on client side
- Testing & modification of code, programs, unit testing, bug fixing
- Requirement study & produce design document
- Design user guide, training to client & upgrading of legacy system
- Software technical support to client & problem resolution
- Technical guide to junior team members
- Client communication and training

Organization: (**DEC 2007** - **JUN 2009**)
Eworx International Lahore Pakistan www.eworxintl.com
Designation: Senior software developer
Roles & Responsibilities:
- Write code for new software and maintain existing software code, deployment on client side

- Testing & modification of code, programs, unit testing, bug fixing

- Requirement study & produce design document

Organization: (**JAN 2004** - **NOV 2007**)
Etechsol Lahore Pakistan http://www.etechsol.com/
Designation: Software developer
Roles & Responsibilities:
- Design and develop software according to customer requirement

- Write code for new software and maintain existing software code, deployment on client side

- Testing & modification of code, programs, unit testing, bug fixing
